## PROJECTS

**DevSecOps CI/CD Pipeline for Netflix Clone** | GitHub July 2026 – Present

- Architected an end-to-end DevSecOps CI/CD pipeline on **AWS EKS** using Jenkins, Docker, and Kubernetes
- Integrated SonarQube, Trivy, and OWASP Dependency-Check for automated **vulnerability scanning**
- Automated Docker image build-and-push using **Jenkins Pipeline-as-Code** for consistent container releases
- Deployed on Amazon EKS using **ArgoCD** for GitOps-based continuous delivery
- Implemented **Prometheus and Grafana** monitoring with real-time pipeline email alerts

## EDUCATION

**Techno Main Salt Lake, Kolkata** 2024 - 2028

Bachelor of Technology in Computer Science and Engineering

- **Coursework**: Data Structures, Algorithms, Operating Systems, Computer Networks, Databases, Machine Learning

## SKILLS

- **Languages & Scripting:** Python, Go, JavaScript, Bash, SQL
- **Cloud & Containerization:** AWS, Azure, Docker, Kubernetes, Amazon ECR
- **CI/CD, IaC & Security:** GitHub Actions, Jenkins, Terraform, Ansible, CloudFormation, Trivy, SonarQube
- **Monitoring & Observability:** Grafana, Prometheus, CloudWatch
- **Lib/Frameworks:** Node.js, React, Express.js, MongoDB
